Lauren. Hi, it's Star. I think you know that I am on the 3 Core board. I am working with Patty and Marc to support the town of Paradise. I want to help you where I can. You may be so over the hubcaps in dealing with everything that is going on. Can I help you at no charge?!

My son works for Wells Fargo and they want to help. Patty, Mark and I would love to meet together. Would Monday afternoon or Tuesday work for you? If we could get clear on where we are going, we can have a line of financial helpers ready to get on board. Know you have to get the council on board. Can we talk about that?

What time are you going to meet with the town employees? I have probably \$60,000 in gift cards that I want to give each Town employee particularly the ones that lost their homes some that's what three raise the money for for those that don't need it or don't feel they should accept it I want them to keep them and pay it forward to somebody that does need them I'm also planning on giving probably 5000 in gift cards to each council member to distribute so those cards are not actually gifts to the council there distribute him on my behalf for our behalf. Does that sound okay to you?? I will have a quantity for you and your key staff to be able to distribute in case a need arises

Lauren,

I wanted to take a moment to wish you and your family a happy thanksgiving. We are forever changed together. Each day takes on a new meaning now and with thanksgiving we all are re-evaluating what we are thankful for. I know that I am thankful for my family and my town family — which I've realized to be one in the same. I am so proud to be apart of this with you. We all lost something in the last two weeks but I trust we've gained much more and many bright days are ahead.

Warmly,

Marc

Happy Thanksgiving Lauren. Hope you are getting to have some self care today.

2 quick questions:

1. Do you have time before 8am tomorrow for me to debrief you on what we have worked on today (proposed DROC approach and staffing needs). I am assuming it will be discussed at your 8am steering team meeting tomorrow.

2. is it appropriate that I attend the steering team tomorrow on behalf of Marc? I can speak to the above with Tom.

And would still love to find time tomorrow when you have time to grab coffee and talk big picture ideas and thoughts.

Feel free to call or txt anytime if you need anything.

Hi Lauren I talked to Alvies and he said you directed him to update you twice a day with information regarding repopulation information and if that's what you desire so be it but your bypassing me.

I have told you throughout this that I will keep you informed when we have a realistic timeline of re entry and right now the soonest that could begin is early this coming week but is contingent on so many factors as we are all aware.

We are working on a potential plan to open the lower zones (9-14) for re entry as well as Pentz road as a road to Magalia because traveling through butte meadows will not be viable for much longer

Just a heads up. I walked into an EOC meeting when I got back. There is a strong push to keep the EOC open for little while longer. Based on the weather coming and the conditions on the hill, the recommendation is to staff an EOC through the weather event to be prepared to support any issues that come up. The plan would be to pull in mutual aid to staff it since town staff are limited at the moment.

This would be separate from the DROC effort, and focused on the weather coming on wed. We will talk this though Marc tomorrow then I suggested we meet with you to OK before they pull the trigger. Are you ok with that approach?

I would be happy to talk through this with you if that would be easier.

Please note that we just sent new meeting schedules starting tomorrow, per requests from jurisdictions for improved communications. We will hold daily briefings for the next two weeks, and will review the need for daily meetings at the end of each week. You may choose to attend in-person or via phone.

We will receive updates from all functions under the unified Disaster Recovery Ops and your individual jurisdictions and the Paradise EOC, as you deem appropriate. This will be a time for Q&A, where we may have the answers or the question may lead to a separate call or meeting.

We'll have our Steering/Oversight Meeting immediately following, but no later than 9:30, whether you are physically at the briefing or remain on the phone.

I hope this works for all of you, as we already had a daily meeting in the morning. With such a large group to bring together, it is impossible to check all calendars.

Please call me with any questions or concerns.

Our City Manager I, Cyrus Abhar, has been in contact with you City Manager to see how we can help. At least we are able to help host residents from one of your retirement homes. It's the least we can do.

I am writing because I am invited to join tomorrow's tour with the Sec of Ag, Sonny Perdue. Odd as it sounds, we went to jr and sr high school together.

So, I just want to ask whether you would be comfortable with me joining the group. Sonny extended the invitation and sent your itinerary.

Hi Lauren. This is Kelli Frost (James wife, Frost Construction). I am sorry to bug you, I am sure you have a lot going on but we are wondering if there is any way for us to get back in to Acorn Ridge to weatherproof our mid construction house. We are very fortunate our house made it, but the smoke damage mixed with the rainfall is going to make it much worse. He only needs a few days to get it wrapped up to prevent more damage. Is there any way he can get in to work on it to help minimize the damage? We are trying to keep the loss/insurance claims at a minimal so it goes to who needs it most. We have all the equipment to help clear lots if someone needs it. Please let me know if there is any way we can make this happen. Every day is costing more and more. We understand that we can't stay there, but if he could just get in with a worker to close up the house before too much damage is done. I hope you are doing well and I am glad your house is still standing also. I know it's been a nightmare for everyone.

Hi Lauren, it's Kate. Hope you're feeling OK and haven't got the flu. I am getting LOTS of calls, texts, and emails regarding the loans for my program. Hcd says that we cannot forgive principal but we can forgive interest. I consulted Gina and she said that I can get back to the folks and let them know the full payoff, principal and interest, until we get Council approval on forgiving any interest. Just wanted to run this by you first. Dina said that we could get it on to the special meeting ag

From: Marc Mattox ,)

Lauren wanted to provide a debrief if today. nothing below is super urgent or I would have called. We can review and discuss when you are well enough to do so. Understanding your desire for information, I would feel remiss in not sending you this lengthy text....

- attended droc daily briefing (1st one)
- signed Emma requests to keep the EOC going for one more week (Wednesday to Wednesday) this will lower our staffing slightly but keep us ready for the incoming major rain (with some wind) event. Considering this weather event and the fact not one town resident has been repopulated it would not be prudent to close the EOC or reduce it to town staffing only.
- steering committee meeting was cancelled today
- attended droc daily briefing conference call. High level updates from each droc division with some info on weather
- worked with David G from Santa Rosa and presented a droc structure proposal
- met with Brian ring Shari McCracken and Paul Hahn on droc structure proposal. Final edits suggested and final draft will be presented to steering committee tomorrow. There is a strong desire to circulate this structure document ASAP to communicate to electeds and public that the droc is up and working on all of the relevant issues
- Jim Broshears is ready to attend press conference tonight and talk about public risks and why it's not safe to repopulate
- initial plans for some Magalia zones to be repopulated today were scrapped by law enforcement and cal fire
- incoming weather event could have low snow levels making access to upper Magalia areas already repopulated via butte meadows very difficult
- the droc is getting rolling but again need to emphasize the need for local town staff to sit and participate on some of these committees. These are not full time jobs. We need to have our voice in the lower levels too so that paradise needs are met. I'd like to recommend the following...
 - - Kevin Peppas for watershed (he's already doing great in the field),
 - - Susan Hartman for Debris Removal and Housing (or Kate Anderson for housing but I think Susan could do both),
 - - Jim Broshears is already on trees
 - - Colette Curtis for economic development and business recovery
 - - Tony Lindsey for Building and Rebuilding

Again, the above is just a recommendation and I know these are not my decisions to make. With that said, the droc is moving forward and we need to ensure it moves with the Town. I envision everyone listed above could do their normal jobs AND sit in on a few meetings and speak up when necessary. The county is doing the heavy lifting. these assignments need to be made or changed to someone else very soon. Preferably before Wednesday.

I'm so sorry to hear you are not feeling well. Get some rest and you'll be back and better than ever!

From: Marc Mattox

Hi Lauren I know this is a bad time. But i have to assign Susan Hartman for at Least Debris Removal division in the droc. I've gathered as much info as I can and she is 100% the best fit here. The other divisions we can discuss as we go but this is a must have ASAP. If it doesn't work moving forward we can adjust be we need a name and number today. Please advise if this is ok. Also I'd like to maintain staff meeting today so there is cross communication between all town functions for a few minutes. Let me know if you have any objections to these recommendations.

Thank you! Hope you're feeling better.

Hi Lauren, Pam and I are committed to rebuilding in Paradise if we can make it happen. We have hopes of purchasing the building at the corner of Pearson & Black Olive Rd. Behind that building is the lot where the Chocolate Fest Building was located. I understand that lot is owned by the Town. I would be interested in knowing if I could purchase it for building a new chocolate factory. Doing my best to make dreams happen. We would love to be the fore-runners in restarting business in Paradise. Let me know when you can. I expect to be in negotiations in 1 to 2 weeks for the Pearson building.

Wanted to clarify a few things... First is that our EOC is not closing but reducing down to a low level activation... We are no longer going to be using the Emma system to staff our individual sections... The call center must be maintained in until the County Gets 211 operating. Logistics will continue to support the tree removal and culvert repairs in a minor role... PIO will continue To represent the interests and position of the town... We can discuss all of this more tomorrow... Just wanted to provide you a quick update and clarify that question about the eoc being completely closed or not.

On my way to the press conference if you need anything please let me know

12/3/2018 4:19:30 PM

From: Marc Mattox

Also what do you think about bringing on George Morris or equivalent to bring the eoc to the finish line when call center is rolled to county and town is fully repopulated? This would allow us both to focus on our respective needs

I was asked to pass on the name of a retired City Manager on to you, in case you want to use her as a consultant or resource. Her name is Jill Keimach. I don't know her. She says her area of expertise is in permitting and rebuilding.

Afternoon, Lauren and Shari. It's Eric Lamoureux. Wanted to give you both a heads up that the White House is apparently planning a conference call with local officials for noon on Thursday. This would be an opportunity for you and your electeds to hit up the White House for any federal asks you May have. As I get particulars on the call details I'll let you both know. This is all I have for now.
